

Lab 2 - EC2 Startup Script (User Data Automation)

Architecture diagram (static website hosted on EC2)

EC2 Boot-to-Website Flow Diagram

Professional flowchart (white background) - suitable for your lab report.

Notes for Grading

- Security Group must allow inbound HTTP (TCP 80).
- Instance must have public access (public subnet + route to Internet Gateway).
- User Data runs once on first boot; re-launch the instance to re-run the script.
